lms is LM Studio's CLI utility for your models, server, and inference runtime.
CLI commit: 9902c3a
```

Usage: **lms** [**options**] [**command**]

Local models

chat	Start an interactive chat with a model
get	Search and download local models or presets
load	Load a model
unload	Unload a model
ls	List the models available on disk
ps	List the models currently loaded in memory
import	Import a model file into LM Studio

Serve

server	Commands for managing the local server
log	Log incoming and outgoing messages

Remote Instances

link	Commands for managing LM Link
-------------	-------------------------------

Runtime

runtime	Manage and update the inference runtime
----------------	---

Develop & Publish (Beta)

clone	Clone an artifact from LM Studio Hub to a local folder
push	Uploads the artifact in the current folder to LM Studio Hub
dev	Starts a plugin dev server in the current folder
login	Authenticate with LM Studio
logout	Log out of LM Studio
whoami	Check the current authentication status
